

In this week's recap: Despite Omicron concerns, stocks end year mostly positive, with strong holiday sales figures.

Weekly Economic Update

Presented by DSA Financial Group, January 3, 2022

THE WEEK ON WALL STREET

Stocks closed out the year on a mostly positive note, adding to the year's gains as concerns about the economic issues of Omicron infections receded.

The Dow Jones Industrial Average rose 1.08%, while the Standard & Poor's 500 picked up 0.85%. The Nasdaq Composite index was flat (-0.05%) for the week. The MSCI EAFE index, which tracks developed overseas stock markets, posted an increase of 0.80%.^{1,2,3}

STOCKS NOTCH RECORD HIGHS

The end of the year is historically a strong period for stocks—a seasonal pattern dubbed “The Santa Claus Rally.” This year's final week of trading did not disappoint as stocks posted healthy gains to kick off the week, despite a global increase in Omicron infections. Investors were buoyed by data that showed fewer associated hospitalizations, which helped ease fears of the variant's economic impact.

The S&P 500 set multiple fresh record highs, with Wednesday's new high representing the 70th such high in 2021, while the Dow Industrials recorded its first new record since November. Stocks drifted on low trading volume in the final two trading days of the year, capping a good week, a solid month, and a strong year for investors.⁴

ROBUST HOLIDAY SALES

The market got off to a good start last week in part due to a strong holiday sales report. A major credit card issuer reported that consumer holiday spending rose 8.5% from last year's levels, driven by an 11.0% gain in online sales. It was the biggest annual increase in 17 years. The spending by consumers exceeded pre-pandemic sales by 10.7%. The retail categories that experienced the highest sales increases were apparel (+47.3%) and jewelry (+32.0%).⁵

It was a particularly robust number in view of investor concerns about supply chain disruptions, port congestion, labor shortages, and wavering consumer confidence.

TIP OF THE WEEK

Sell old stuff to fund a new experience. Sell what you don't need online or at a yard sale when the weather warms up and use the proceeds to partly or fully fund a vacation, an education, or an adventure.

THE WEEK AHEAD: KEY ECONOMIC DATA

Tuesday: JOLTS (Job Openings and Turnover Survey). Institute for Supply Management (ISM) Manufacturing Purchasing Managers' Index (PMI).

Thursday: Jobless Claims. Factory Orders. Institute for Supply Management (ISM) Non-Manufacturing Purchasing Managers' Index (PMI).

Friday: Employment Situation.

The market indexes discussed are unmanaged, and generally, considered representative of their respective markets. Index performance is not indicative of the past performance of a particular investment. Indexes do not incur management fees, costs, and expenses. Individuals cannot directly invest in unmanaged indexes. Past performance does not guarantee future results.

The Dow Jones Industrial Average is an unmanaged index that is generally considered representative of large-capitalization companies on the U.S. stock market. Nasdaq Composite is an index of the common stocks and similar securities listed on the NASDAQ stock market and is considered a broad indicator of the performance of technology and growth companies. The MSCI EAFE Index was created by Morgan Stanley Capital International (MSCI) and serves as a benchmark of the performance of major international equity markets, as represented by 21 major MSCI indexes from Europe, Australia, and Southeast Asia. The S&P 500 Composite Index is an unmanaged group of securities that are considered to be representative of the stock market in general.

U.S. Treasury Notes are guaranteed by the federal government as to the timely payment of principal and interest. However, if you sell a Treasury Note prior to maturity, it may be worth more or less than the original price paid. Fixed income investments are subject to various risks including changes in interest rates, credit quality, inflation risk, market valuations, prepayments, corporate events, tax ramifications and other factors.

International investments carry additional risks, which include differences in financial reporting standards, currency exchange rates, political risks unique to a specific country, foreign taxes and regulations, and the potential for illiquid markets. These factors may result in greater share price volatility.
